

Accessibility Statement

We firmly believe that the internet should be available and accessible to anyone regardless of ability and are committed to providing a website that is accessible to the broadest possible audience.

We aim to adhere as strictly as possible to the World Wide Web Consortium's (W3C) Web Content Accessibility Guidelines 2.1 (WCAG 2.1) at the AA level. These guidelines explain how to make web content accessible to people with a wide array of disabilities. Complying with those guidelines helps us ensure that the website is accessible to the visually impaired, people with motor impairments, and more.

We aim to support as many browsers and assistive technologies as possible, so our users can choose the best fitting tools for them, with as few limitations as possible. Therefore, we have worked very hard to be able to support all major systems that comprise over 95% of the user market share, including Google Chrome, Mozilla Firefox, Apple Safari, Opera and Microsoft Edge, JAWS, and NVDA (screen readers), both for Windows and MAC users.

Despite our very best efforts to allow anybody to adjust the website to their needs, there may still be pages or sections that are not fully accessible, are in the process of becoming accessible, or are lacking an adequate technological solution to make them accessible. Still, we are continually improving our accessibility, adding, updating, improving its options and features, and developing and adopting new technologies. All this is meant to reach the optimal level of accessibility following technological advancements.

If, at any time, you have trouble with any content or functionality on our website, or you require assistance with any part of our site, please contact us by calling (319) 352-4120 or you may contact us by filling out the form on our contact page located here: <https://waverlyhealthcenter.org/contact/>
